Above is an example of a routine medication order. The report reflects the order date, the discontinue date, the name and dose of the medication, the time to dispense, the days of the month for check off, etc.

Medication lists are included in the CCD which can be generated at any time and sent via secure e-mail.

## **General Features:**

- Input or edit physician orders, treatment orders, and MARS forms and notes that are configured to facility specifications. Orders may include treatment, dietary, medication, or any other standing order.
- Demographic data, admissions, and discharges are read from the ADT module.
- Supports drug and treatment templates. Frequency Codes determine times and instructions, tables, and other aspects of administration.
- Automatic calculation of stop dates.
- Laser plain paper forms can be Cardexed or put in a three-ring binder.
- Printout position preferences are supported.
- Mouse pull downs and data dictionaries are major input methods.
