Resident Management System Preadmission

Maintain applicant information with the ability to produce automatic ,user-configured follow-up letters.

Reports include Human Rights survey relevant data.

Upon admission, the information is transferred to the RMS Census module. An HL-7 interface is available for hospital data.

The above illustrates just one screen in the preadmit process. Information may be updated as the prospect moves from the initial inquiry to moving into your facility. Data may then be transferred to the Census once admission takes place.

General Features:

- Transfer resident pre-admission information into the Medical Record upon admission. HL-7 interface is available for hospital data.

- Complete control over all application data and necessary documentation.

- Tracks first, most recent, and PRI completion dates.

- Holds any number of primary diagnoses and ICD9 Codes, which can be pulled from a context sensitive pop-up window.

- Prints a Pre Admit Face Sheet.

- Facility configured categories of data collection.

- Human Rights survey data is included among the reports. All reports may be exported to other applications.

- Context sensitive help screens.
