

## Resident Management System Resident Activities

This option schedules Resident Activities, produces a monthly activity calendar, tracks activities and attendance, and produces both summary and detailed reports by individual, unit, facility, and activity between user selected dates.

Resident attendance is easily entered and tracked by the use of "pop-up" resident lists. Date, start time, end time, length of activity, facility space, equipment requirement, and staff data are easily tracked for any and all activities.

A conflict report indicates time and activity conflicts for individual residents.

### General Features:

- Schedules and tracks resident activities and events.
- Create an activities calendar for a resident. Reports on activities for summary reports.
- Produce summary and detailed reports by individual, unit, facility, and activity between user selected dates.

### Important Features:

You have the ability to maintain a complete record for any resident activity including time, staff and facility space or equipment necessary, and residents wishing to attend/actually attending.

A report can quickly reveal any conflicts residents may have with appointments or other activities.
